

## HOY 'AIROFLOW' SPORT BOOTS

A unique groundbreaking design, allows large volumes of air to 'ventilate' in a constant flow; keeping the leg (and particularly tendons) cooler during hard work. Made from tough ventilating mesh on the outside and a comfortable, but strong, 'free-flow' foam mesh lining. Airoflow® boots are unique – the harder the horse is working, the greater the flow of cooling air. Incorporates strong tendon and cannonbone guards - light in weight and ideal for cross-country and racing. Machine washable at 40°C. International registered design.

Colour: Black

Sizes: S, M, L

RRP \$149.95

## HOY 'TRAVELWISE' BOOTS

Unique two flap, quick and simple fastening with extra protection over the knee and hock. Soft, breathable lining for comfort, which can easily be rinsed off for hygiene. Tough PP reinforcement around the hoof area. Secure fit that will not slip or go baggy. Developed by Andrew Hoy, who probably has more experience travelling horses over long distances than any other rider.

Colour: Sapphire Blue
